VIVEK KUMAR

Cybersecurity | Data Analytics | Software Development

+91-9835028847 | vivekrajput7468@gmail.com | Delhi NCR, India | github.com/vsrajput45 | linkedin.com/in/your-profile

SUMMARY

BCA student focused on cybersecurity and data analytics, with hands-on experience in security projects, SQL/DBMS, Linux environments, and data-oriented problem solving. Interested in security monitoring, threat detection, data analysis, and visualization.

SKILLS

Cybersecurity: Network Security, Firewalls, IDS, Cryptography, Vulnerabilities, Threat Analysis

Data: SQL, MySQL, PostgreSQL, DBMS, Data Cleaning, EDA, Visualization, Excel

Programming: Python, C, C++, Java, JavaScript, TypeScript, Solidity, ethers.js

Web & Tools: React, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, Linux, Kali Linux, Git/GitHub, VS Code, Vercel

PROJECTS

TrustChain-ID | Solidity, ethers.js, React, Node.js, PostgreSQL **2026**

- Decentralized identity and access management: DIDs, smart-contract RBAC, ERC-721 asset tokenization, immutable audit trail; QR-based asset verification with unauthorized-access simulation demos.
- HackCOSMIC 2026, Cybersecurity & Digital Trust track (team of four); ran a prior-art review to scope the differentiation honestly.

AI-Based Cyber Attack Detection System | Python, SQL, Linux/Kali Linux **2026**

- Concept project for identifying suspicious network/attack patterns and surfacing security alerts through a monitoring interface.
- Applied data-oriented analysis to security events to support detection, investigation, and visualization of potentially malicious activity.

CheckMyBill | Next.js, TypeScript, FastAPI, PostgreSQL **2026**

- Patient-side healthcare cost transparency: pre-admission symptom triage with CGHS/PM-JAY fair-price estimates, plus post-discharge OCR bill audit flagging duplicates, upcoding, and arithmetic errors via a deterministic rules engine.
- VibeCon 2.0, HealthTech track; authored the Round 1 submission and phased 8-hour build plan.

UrjaMitra | Python **2026**

- Hash-chained tamper-evident M&V ledger for industrial energy decisions; deterministic 7-day compressor dataset generator (672 rows) plus a 3-minute demo runbook.
- Yuva Yodha Energy Tech Hackathon entry with Team NyiSoch2.0 (pitch deck + working prototype).

EXPERIENCE / INNOVATION

Smart India Hackathon / Academic Innovation Projects 2026

- Worked on problem statements across cybersecurity, blockchain, digital twins, and data-driven systems.
- Prepared technical architectures, dashboards, prototypes, demonstrations, and judge-oriented project explanations.

EDUCATION

Noida International University, Uttar Pradesh 2025 – 2028

Bachelor of Computer Applications (BCA)

CERTIFICATIONS

Generative AI — Google Cloud | Data Analytics — Deloitte

ACHIEVEMENTS

- Smart India Hackathon / internal hackathon participation.
